PROFESSIONAL SUMMARY

Mobile and web application developer with hands-on experience delivering production React Native, React.js, and Flutter applications across fintech-adjacent, e-commerce, tailoring, tourism, and field-survey domains. Comfortable owning features end-to-end — from Firebase-backed authentication and real-time data to role-based access, push notifications, and payment integrations. Known for shipping live, user-facing products and adapting quickly to new client stacks.

CORE SKILLS

Mobile & Frontend: React Native, React.js, Flutter, JavaScript, TypeScript, ECMAScript, Redux, Redux Toolkit

Backend & Data: Firebase, Cloud Firestore, Social Login, REST API Integration, Push Notifications, SQL Server, MVC, .NET

Tools & Platforms: Git, GitHub Desktop, Xcode, MS Excel, MS Word, Cursor, Claude

WORK EXPERIENCE

React Native Developer | A2Z Creatorz (Leading Web & Digital Agency)

Aug 2025 – Present

- Develop and maintain cross-platform React Native applications for agency clients, translating product requirements into functional, production-ready features.
- Integrate REST APIs, Firebase services (Auth, Firestore, push notifications), and third-party SDKs to deliver complete app experiences.
- Collaborate with designers and backend engineers in an agency setting to ship multiple concurrent client projects on schedule.

React Native Developer | IliveSolutions

May 2022 – Aug 2024

- Built and shipped multiple live React Native applications end-to-end, including e-commerce, tailoring-workflow, tourism, and field-survey products.
- Implemented role-based access control (e.g., Mechanic/Dealer/Admin, multi-role survey flows) and complex business logic such as wallet systems, invoicing, and QR-based scan verification.
- Integrated payment flows, real-time chat, and push notifications; used Firebase Cloud Firestore for real-time data across apps.
- Worked on an offline-capable, multi-role survey application for a World Bank-funded flood reconstruction program in Balochistan.

KEY PROJECTS

Future Parts App (Live) — Reward-based app for mechanics with QR scans, spin logic, wallet system, and dealer scheme tracking; role-based access for Mechanic, Dealer, and Admin.

Happy Home App (Live) — Full e-commerce solution with product browsing, cart, secure checkout, promotions, and admin management.

Glydde App (Live) — Live tourism guidance platform with real-time chat, push notifications, and in-app payments between guides and tourists.

Stitch2Stitch / TriStar Apps (Live) — Tailoring order-management apps with invoicing, order booking, and payment tracking for local stitching businesses.

HRU – House Reconstruction Unit (World Bank-funded) — Offline survey app for flood-affected home reconstruction in Balochistan, with multi-role form validation and correction flow.

Time Medico, OBS Pharma & Onfix Apps (In Progress) — E-commerce medicine delivery, D2D pharma scan-verification, and home-appliance repair marketplace platforms.

EDUCATION

BSCS – Bachelor of Computer Science

Feb 2020 – Feb 2024

Web & Mobile Application Development Course

Mar 2021

Intermediate (Pre-Engineering)

Dec 2019

Matriculation

Aug 2016
